

FOOD ANALYSIS

QUALITY FOR A BETTER LIFE®

GALAB INTERNATIONAL

While the analytical process itself is carried out in our laboratory based in Hamburg, GALAB maintains subsidiaries and representatives all over the world, including Peru, Ukraine, Singapore, the Philippines, Turkey, China, South Africa and Spain. Our representatives understand local market conditions and can efficiently assist you with your specific needs.

Who are we?

GALAB Laboratories is an independent, privately owned analytical laboratory based in Hamburg, Germany. As one of the leading players in the field of trace analysis and a constant innovator in new analytical methods, GALAB has been serving customers from various industries all over the world for more than 30 years and is an officially accredited laboratory by the **German Accreditation Body (DAkkS)**.

We orientate our services to the needs and wishes of our individual customers, providing them with tailor-made advice, including both **consultation** and **sampling**.

Our analysis is carried out in-house in a one-stop shop, so there is no need for samples to be shipped back and forth from different locations.

What we offer:

At GALAB, we excel in a wide range of services, serving different industries with precision and professionalism. Multiple **organic- and baby food** manufacturers around the world place their trust in our expertise and commitment to quality.

We specialize in the detection of:

- Pesticides
- Heavy Metals
- Mycotoxins
- Microbiological pathogens
- Allergenic substances
- GMOs
- Nutritional values
- MOSH / MOAH
- Dioxins / Furans
- PFAS

Our spectrum of parameters is continuously updated to the latest developments in the analysis sector to ensure the safety of your products.

Safe Food Contact Materials

Ensuring food safety starts with the materials that come into contact with it. Our comprehensive Food Contact Materials analysis is designed to help you guarantee the highest standards of safety and compliance, protecting both your customers and your brand.

We specialise in regulatory compliance testing, such as ensuring materials meet EU, FDA and other global safety standards. Substances such as **plasticisers**, **mineral oil residues** or **heavy metals** are often in the focus of legislators. To maintain legislative adherence, we offer thorough analyses and tests to identify and quantify these substances in your materials.

Focusing on the potential transfer of chemicals from packaging materials to food, we offer thorough migration testing services, including both **specific migration testing** and **overall migration testing**.
